

Hosting the dataset using IBM DB2

The screenshot displays the IBM Cognos Analytics with Watson interface. On the left, the 'Data server connections' panel lists two connections: 'ADA_IBM' (created 11/18/2022, 2:19 PM) and 'Weather Company' (created 3/31/2022, 8:44 PM). The main panel shows the details for the 'ADA_IBM' connection, including its owner (Bhagav ... b8c4d4), creation and modification dates, and type (Data Server). The 'Connections' tab is active, showing a table with columns 'Name' and 'Modified'. Below this, the 'Schemas' tab is active, displaying a list of schemas: AUDIT, DB2GSE, DB2INST1, DSJOBMGR, DSSCHED, DSSHSV1, DSWEB, DSWEBSECURITY, and ERRORSHEMA. The 'Tables loaded' column is empty. The bottom of the screen shows a Windows taskbar with various application icons and a system tray with the date and time (02:22 19-11-2022).

The screenshot shows the IBM Cloud dashboard for the 'Db2-qc' resource. The resource is listed as 'Active' with a green checkmark. The 'Manage' tab is selected, showing a 'Getting started' section with instructions on how to find credentials and a 'Need help?' section with a link to submit a support case. The bottom of the screen shows a Windows taskbar with various application icons and a system tray with the date and time (02:21 19-11-2022).
